PROTECTED ANIMALS IN HOHES VENN

The Hohes Venn
protected area is a
unique nature reserve
with many rare and
endangered species.

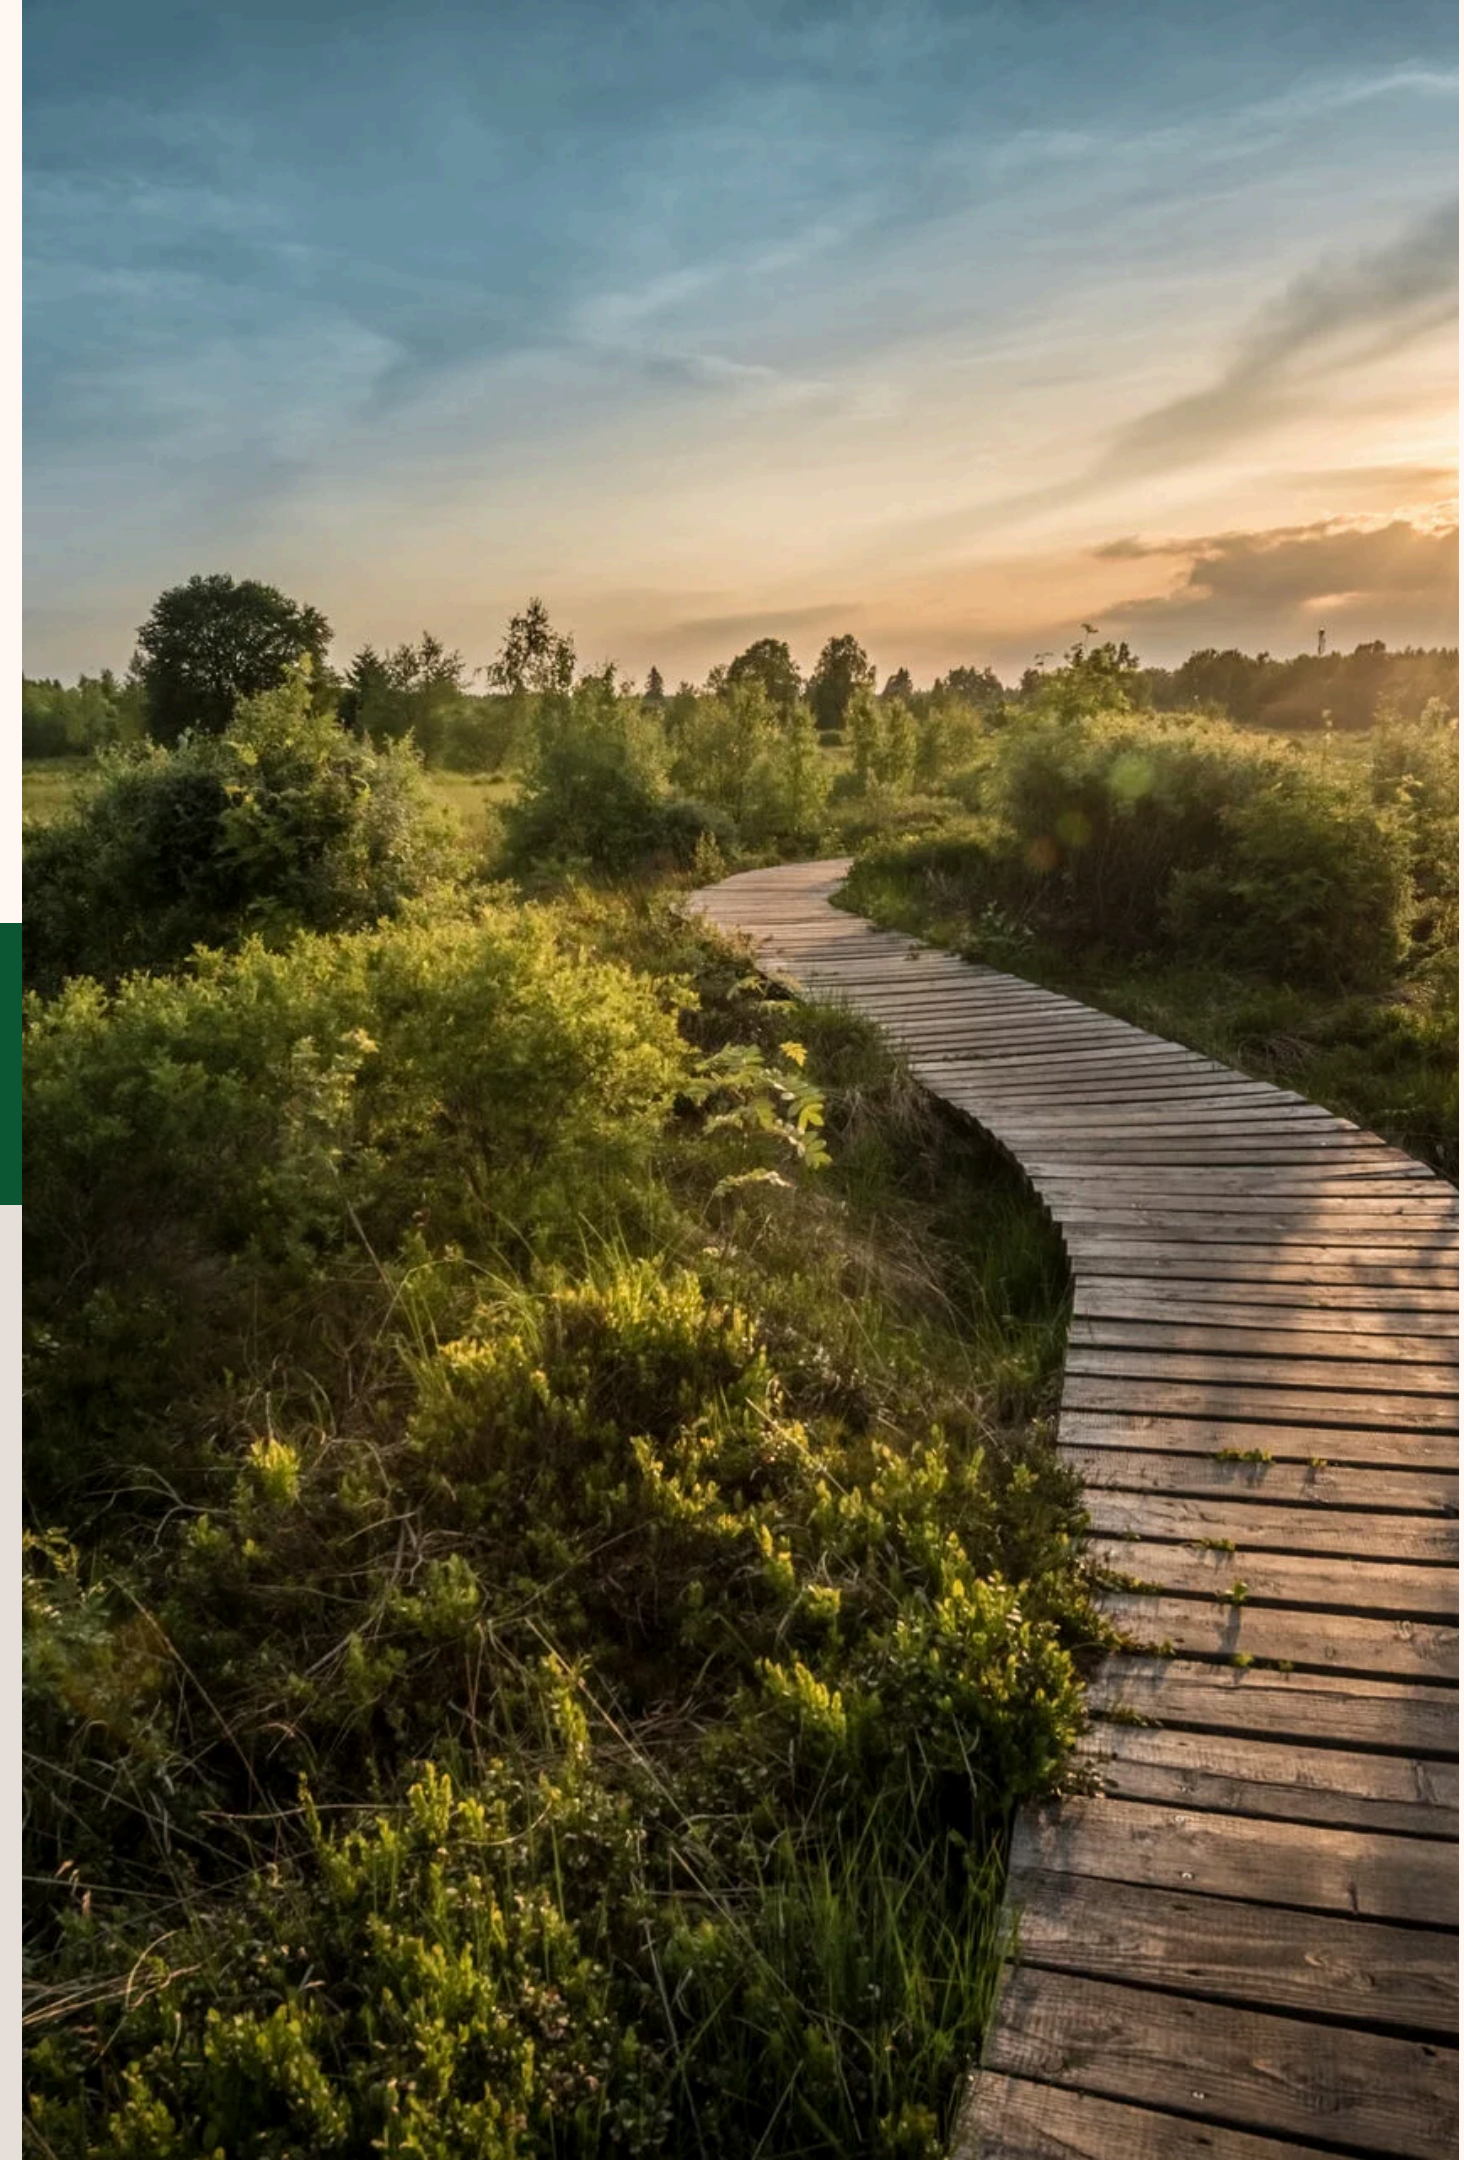

INTRODUCTION

HOHES VENN

Swampy highland area on the border of Belgium and Germany.

The Hohes Venn protected area is a unique nature reserve with many rare and endangered species.

TETŘÍVEK OBECNÝ (HAZEL GROUSE)

- It is a protected bird species
- in heathlands (=vřesoviště)
- the male has dark feathers
- sensitive to being disturbed by people
- rare in Hohes Venn

KOČKA DIVOKÁ EVROPSKÁ (EUROPEAN WILDCAT)

- hunts mainly at night
- it feeds on small mammals (= savci)
- is a protected species
- in Belgium it is considered one of the rare animals

similar to a domestic cat..

..but lives in the forests

THE ONLY VENOMOUS SNAKE IN BELGIUM

ZMIJE OBEČNÁ

(EUROPEAN ADDER / VIPER)

- **wavy line on the spine**
- **lives in sunny places**
- **hunts small animals**
- **protected by law**
- **he/she usually avoids people**

- **rarer than a white stork**
- **black shiny feathers**
- **nests in quiet forests**
- **feeds on fish and frogs**
- **needs a clean environment**

PROTECTED BIRD

ČÁP ČERNÝ

(BLACK STORK)

VYDRA ŘÍČNÍ

(EURASIAN OTTER)

- lives by rivers and streams (is an indicator of clean water)
- excellent swimmer, thick fur
